
Recommendation Letter – Ankit Bharti

November 13, 2025

To Whom It May Concern:

I am writing to highly recommend Mr. Ankit Bharti for future employment opportunities. Ankit joined Custom Biometric Wearables, Inc. (d/b/a AwareCBW) as a Data Analyst, supporting our scan-data business and database operations. From the outset, Ankit demonstrated strong analytical capabilities, professionalism, and a consistently positive attitude.

In 2024, our company executed a large, specialized data project valued at nearly \$1M. Ankit played an important role in helping maintain, organize, and manage the associated data structures and workflows. He is detail-oriented, dependable, and thoughtful in his approach to handling complex information. He also collaborated well across engineering, product, and operations teams, adapting quickly to our fast-paced startup environment.

As our business evolved heading into 2025 and 2026, demand for data-services work declined. The customer did not renew the specialized project, and our strategic focus shifted entirely to our rapidly growing custom hearing protection business in the defense and industrial sectors. Because our company is still small, this shift has required us to eliminate internal database and data-management functions and consolidate resources around sales, manufacturing, and tactical operations. As a result, Ankit's position was eliminated solely due to restructuring and not performance.

Throughout his time with us, Ankit consistently demonstrated professionalism, strong work ethic, and integrity. He handled confidential information responsibly and contributed positively to our culture. We are grateful for his work and wish him every success.

Ankit would be an asset to any employer seeking an analytical, dedicated, and reliable team member. Please feel free to contact me directly for any additional information.

Sincerely,

David Russ
